

## **The Shyft Group to Debut Last-Mile Electric Delivery Vehicle at NTEA Work Truck Week**

February 8, 2022

**Leader in last-mile fleets to introduce road-ready, full vehicle solution deployable in 2023**

**Supporting EV transition with fully portable power cube tailored for customer needs**

**Leveraging existing infrastructure for manufacturing and service enables speed to market and scale**

NOVI, Mich., Feb. 8, 2022 /PRNewswire/ -- The Shyft Group (NASDAQ: SHYF), the North American leader in specialty vehicle manufacturing, assembly, and upfit for the commercial, retail, and service specialty vehicle markets, announced it will reveal its all-new electric delivery vehicle on their proprietary, purpose-built Class 3 EV chassis at the NTEA Work Truck Week trade show taking place in Indianapolis from March 8-10.

"Unable to find a viable EV chassis option in the market, we decided to build our own," said Shyft Group CEO Daryl Adams. "We developed our proof of concept by leveraging nearly 50 years of experience in custom chassis production and last-mile delivery and will put prototypes in our customers' hands for testing and validation in the 2<sup>nd</sup> half of 2022. Leveraging the infrastructure that supports our coast-to-coast manufacturing and service footprint, we're poised to produce at scale to support the sharply rising demand for last-mile delivery vehicles as well as our customers' carbon-neutral goals."

Using the company's proprietary Work-Driven Design® process, the electric vehicle is a purpose-built walk-in delivery van that will reach a new benchmark in delivering optimal driver ergonomics and user experience. Vehicle prototypes are expected to reach customers for route testing in the coming months, with production expected to begin by mid-2023.

Shyft is also helping customers in the transition to electric vehicle fleet management by providing an industry-first, purpose-built, portable power cube, which will also be featured at the show.

Shyft's proprietary battery-powered chassis features customizable length and wheelbase, making it well-suited to serve a wide range of medium-duty trucks. The chassis' modular design will accommodate multiple GVWR classifications,

based on build-out and usage. The lithium-ion battery packs provide an approximate range of 150 to 175 miles with the opportunity to enhance range through expanded battery options.

With a high degree of configurability, the all-electric chassis is adaptable to last-mile delivery, work truck, mass transit, recreational vehicle and other emerging EV markets.

The Shyft Group will hold a press conference at Work Truck Week to unveil the new EV delivery van and chassis on Wednesday, March 9, from 10:00 to 10:25 a.m. in booth #3511.

In addition, Shyft brands DuraMag and Utilimaster will also make news at Work Truck Week, with press conferences scheduled for Thursday, March 10. DuraMag will present its new S-series all-aluminum service body at 10:00 a.m. in booth #3053, while Utilimaster follows at 10:30 a.m. in booth #3049 to show the Velocity R2, an under 10,000 lb. GVWR walk-in van built on a RAM ProMaster chassis.

### **The Shyft Group**

The Shyft Group is the North American leader in specialty vehicle manufacturing, assembly, and upfit for the commercial, retail, and service specialty vehicle markets.
